THERMOSCALE ÜRÜNLERİ

FUJIFILM THERMOSCALE NEDİR ?

Fujifilm Thermoscale, uygulandığı proseslerde yüzeydeki ısı dağılımını ve paralelliğini görebildiğimiz endüstriyel bir filmidir.

NASIL KULLANILIR ?

Film ısı kaynağı ile temas ettiğinde, temas süresi ve sıcaklığına bağlı olarak film üzerinde bir renk oluşur. Film üzerinde oluşan ve değişkenlik gösteren renklerin yoğunluğuna göre ısı dağılımını görebiliriz. Ürün 210°C ısıya kadar dayanıklıdır.

■ Uniform heat distribution

■ Non-uniform heat distribution

ÜRÜN KODLARI VE ÖLÇÜLERİ RENK SCALA DEĞERLENDİRMESİ

THERMOSCALE 100

	80	85	95	105	°C
Contact for 1 second					
Contact for 10 seconds					
Contact for 60 seconds					
*Note: The above sample colors were produced by Fujifilm under test conditions. Calibration should be performed under actual usage conditions to ensure temperature correspondence. Recommended temperature range: 15°C-30°C Recommended humidity: 35% RH-80% RH					

TYPE	THERMOSCALE 100C
THICKNESS	0.09 MM
ROLL SIZE	297 MM X 10M
TEMPERATURE RANGE	80 °C ~ 105 °C

THERMOSCALE 200

	150	160	170	180	190	200	210	°C
Contact for 1 second								
Contact for 10 second								
Contact for 60 second								
*Note: The above sample colors were produced by Fujifilm under test conditions. Calibration should be performed under actual usage conditions to ensure temperature correspondence. Recommended temperature range: 15°C-30°C Recommended humidity: 35% RH-80% RH								

Type	Thermoscale 200C
Thickness	0.1mm
Roll Size	270mm × 5m

UYGULAMA ÖRNEKLERİ

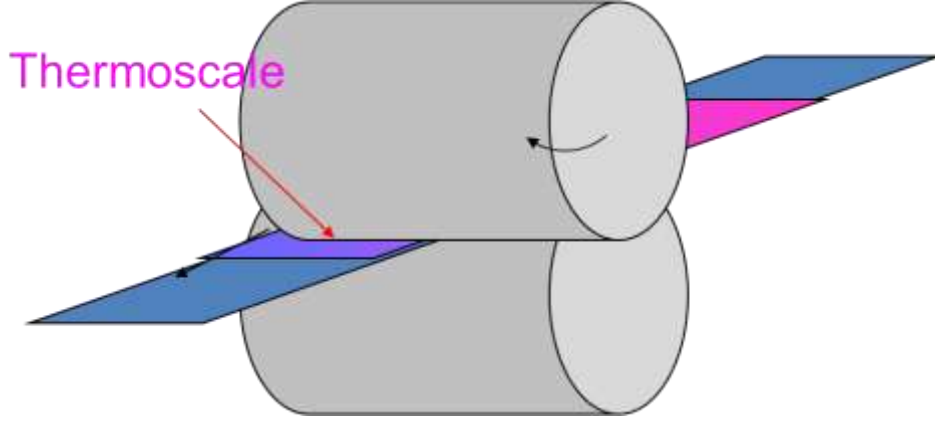

► SICAK MÜHÜRLEME

► ISI DAĞILIMI

► ISI DAĞILIMI

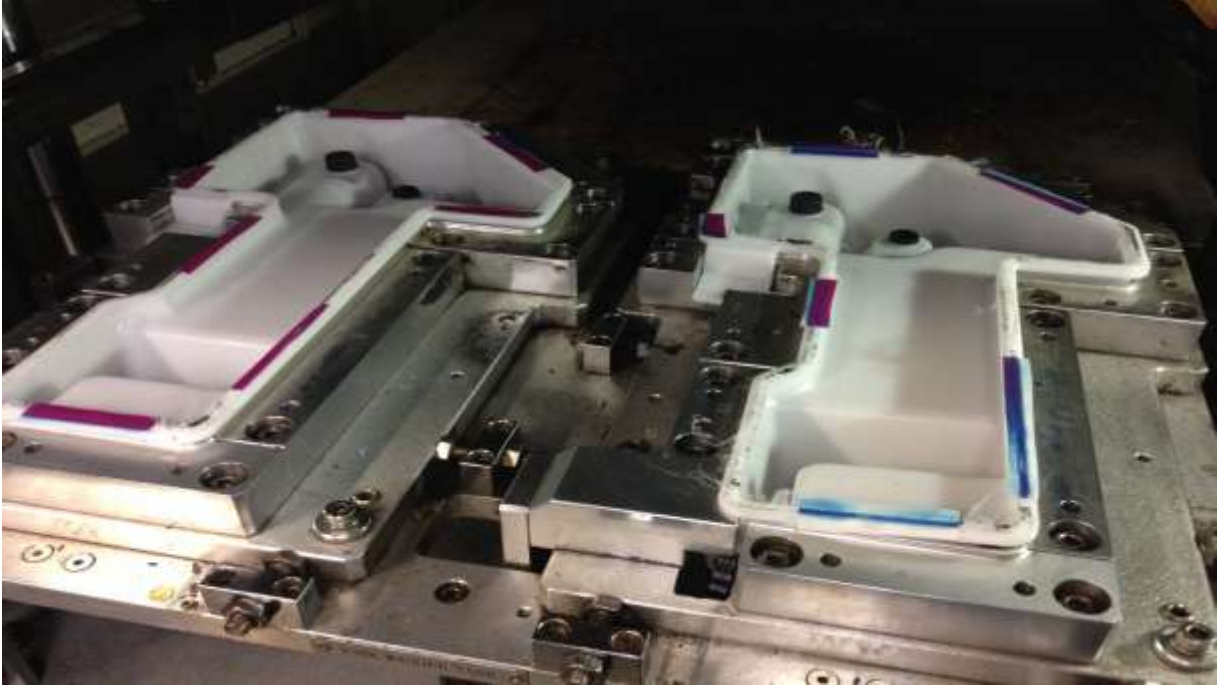

SİLİNDİRLER ARASINDAKİ ISI DAĞILIMINI ÖLÇME.

► ISI DAĞILIMI

RAM KURUTMA MAKİNALARINDAKİ ISI DAĞILIMI & HOMOJENLİĞİ KONTROL ETME

► ISI DAĞILIMI
